1. Introduction

1.1 General Information for the users

Thank you for purchasing Young Tech Co., Ltd products. Each product has been fully inspected after its production to offer you the highest quality and reliable performance. Please read the product manual carefully prior to installing and commission the product.

- For the safety, it is important to follow the instructions in the manual. Young Tech Co., Ltd will not be responsible for any damages caused by user's negligence.
- The manual should be provided to the end-user.
- Any modifications or repairs to the product may only be performed if expressed in this manual.
- > The manual can be altered or revised without any prior notice. Any changes in product's specification, design, and/or any components may not be printed immediately but until the following revision of the manual.
- > The manual should not be duplicated or reproduced for any purpose without prior approval from Young Tech Co., Ltd, Gimpo-si, South Korea.

1.2 Manufacturer Warranty

- For the safety, it is important to follow the instructions in the manual. Manufacturer will not be responsible for any damages caused by user's negligence.
- Manufacturer will not be responsible for any damages or accidents as a result of any alteration or modification of the product and its parts. If any alteration or modifications are necessary, please contact Young Tech Co., Ltd directly.
- Manufacturer warrants the product from the date of original purchase of the product for one (1) year, except as otherwise stated.
- Manufacturer warranty will not cover products that have been subjected to abuse, accidents, alterations, modifications, tampering, negligence, misuse, faulty installation, lack of reasonable care, repair or service in any way that is not contemplated in the documentation for the product, or if the model or serial number has been altered, tampered with, defaced or removed; damages that occurs in shipment, due to act of God, failure due to power surge, or cosmetic damage. Improper or incorrectly performed maintenance will void this limited warranty.
- For detailed warranty information, please contact Young Tech Co., Ltd South Korea.

2. Product Description

2.1 General

YT-930 series, I/P converter receives DC 4~20mA signal from the control room and outputs 0.02 ~ 0.1 MPa signal to pneumatic-pneumatic positioner to operate a control valve system. YT-930 series is designed to be used in non-explosion proof environment.

2.2 Main Features and Functions

- Low air consumption level yields to lower plant operating cost.
- > a wide range of uses with IP66 protection grade.
- ➤ (Amb. Temp. T5: -40~85°C, T6: -40~75°C)
- ➤ Can be used at low voltage (8.5 V) and can be compatible with most of general controllers.
- Polyester painting makes the product strong against corrosion environment.
- > Easy dial adjustment for Zero and Span.
- Modularized inner parts make maintenance easy and simple.
- > I/P converter operates normally during sudden changes in supply pressure and / or high vibration environment.
- > Air filter regulator <YT-200 series> can be directly installed without any pneumatic piping.

2.3 Label Description

EXPLOSION PROOF: Non-Explosion

OPERATING TEMP.: -40°C ~ 85°C (-40°F ~ 185°F)

PROTECTION OF ENCLOSURE: IP 66

Young Tech Co., Ltd

Yangchon-eup, Gimpo-si,
Gyeonggi-do, Korea

Fig. 1: YT-930 Body Label <Sticker>

A. Explosion Proof: Indicates certified explosion proof grade.

B. Operating Temperature: Indicates allowed operating ambient temperature range.

C. Protection of Enclosure: Indicates protection grade.

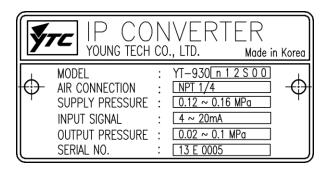

Fig. 2: YT-930 Body Label

A. Model: Indicates the model number.
B. Air Connection: Indicates air connection type
C. Supply*: Indicates the supply pressure range.
D. Input Signal: Indicates input signal range.
E. Output Pressure: Indicates output pressure range.
F. Serial No.: Indicates the unique serial number.

YT-930 series

5

 $^{^{*}}$ For general application, YT-930 series supply pressure is set as 0.12 ~ 0.16 MPa (1.2 ~ 1.6 bar) for general application. For any other special application, YT-930 can have 0.02 MPa (higher than output pressure).

2.4 Product Number

YT-930 1 2 3 4 5 6

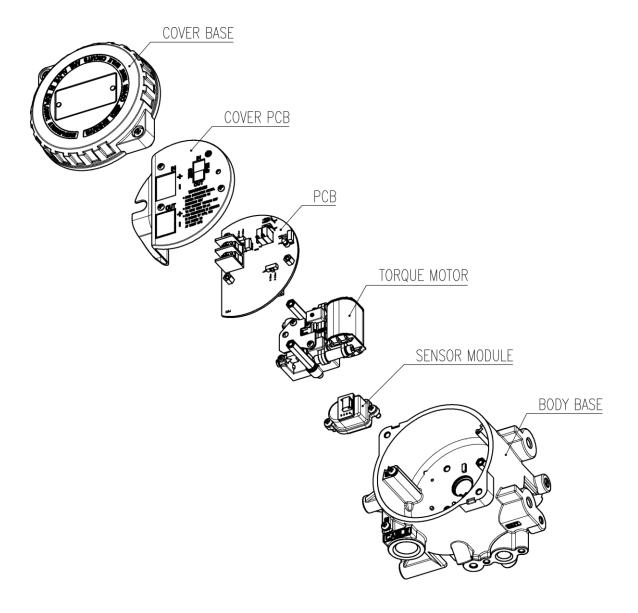

1	Explosion Proof	n	Non-Explosion
2	Output Pressure	1 2 3 4	0.02 ~ 0.1 MPa 0.00 ~ 0.12 MPa 0.04 ~ 0.2 MPa 0.00 ~ 0.23 MPa
2	Connection Type	1 2	PT NPT
3	Ambient Temp.	S L	-30 ~ 85 'C -40 ~ 85 'C
4	Option	0 1	None +Feedback Signal (4 ~ 20mA DC)
5	Gauge	0 1 2	None 0 ~ 0.2 MPa 0 ~ 0.4 MPa

2.5 Product Specification

Мо	del	YT-930		
Input Signal		4~20mA DC		
	Standard	0.02 ~ 0.1 MPa (0.2 ~ 1.0 bar)		
Output Signal	Multi-range	0.00 ~ 0.12 MPa (0 ~ 1.2 bar)		
		0.04 ~ 0.2 MPa (0.4 ~ 2.0 bar)		
		0.00 ~ 0.23 MPa (0 ~ 2.3 bar)		
Supply	Standard	0.12 ~ 0.16 MPa (1.2 ~ 1.6 bar)		
Pressure	Minimum	0.2MPa higher than Max Output pressure		
	Maximum	0.24 MPa (2.4 bar)		
Explosion Proof		Non-explosion		
Operating 1	Temperaure	-40 ~ 85°C (-40 ~185'F)		
Air Cons	sumption	Below 2 LPM (sup = 0.14 MPa)		
Flow C	apacity	70 LPM (sup = 0.14 MPa)		
Hyste	eresis	±0.5% F.S.		
Sens	itivity	±0.2% F.S		
Repea	tability	±0.3% F.S.		
Air Con	nection	PT / NPT 1/4		
Condu	it Entry	PF 1/2 (G 1/2)		
Prote	ection	IP 66		
Operating	g Voltage	Min 6.0 V (at 4mA)		
Operating	y voltage	Max 7.2 V (at 20mA)		
Mate	erial	Aluminum Diecasting		
Wei	ight	1.6kg (3.53 lb)		
Pain	nting	Polyester Powder Coating		
Internal Fr	ee Volume	700 cm ³		

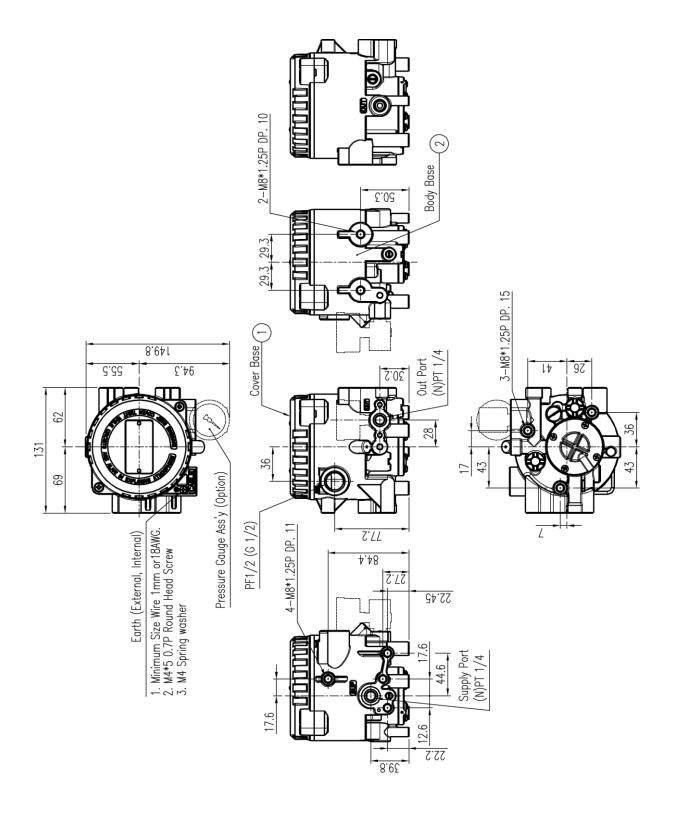

As input signal is being supplied to YT-930, the pressure sensor, which is connected to output port, will sense the pressure level. The main PCB will compare the input signal and output pressure level and increase or decrease the electric current of torque motor.

3. Installation

3.1 Safety and Installation Tips

When installing the unit, please ensure to read and follow safety instructions.

- Any input or supply pressures to valve, actuator, and / or to other related devices must be turned off.
- > Use bypass valve or other supportive equipment to avoid entire system "shut down".
- In case of hazardous area, please ensure there is no explosion gas in the atmosphere.
- When installing the unit, please ensure the cover base is headed upward or the cover should face front, as shown in section 2.7.2.. This will ensure internal dew condensation can leak out through the draining hole.

YOUNG TECH Co., Ltd

4. Connections

4.1 Safety

- > Supply pressure should be clean and dry air avoiding moisture, oil or dust.
- Always recommended to use air filter regulator (i.e. YT-200 series).
- Young Tech Co., Ltd has not tested positioner's operation with any other gases other than clean air. Please contact Young Tech Co., Ltd for any questions.

4.2 Supply Pressure Condition

> Dry air with at least 10°C lower than ambient temperature.

- Avoid from dusty air. If require, we recommend to use air filter regulator which contains 5 micron or lower filter (YT-200)
- Avoid oil.
- Comply with ANSI/ISA-57.3 1975(R1981) or ISA S7.3-1975(R1981).
- ➤ Is designed to be used with the pressure below 0.24 MPa (2.4 bar).
- > Set air filter regulator's pressure level 0.02 MPa (0.2 bar) higher than required max output pressure.

4.3 Piping Condition

- Ensure inside of pipe is clean of obstructions.
- Do not use pipeline that is squeezed or shows any type of damanges.

- > Pipeline should have more than 6mm of inner diameter (10mm outer diameter) to maintain flow rate.
- The length of pipeline system should not be extremely long. Longer pipeline system may affect flow rate due to the friction inside of the pipeline.

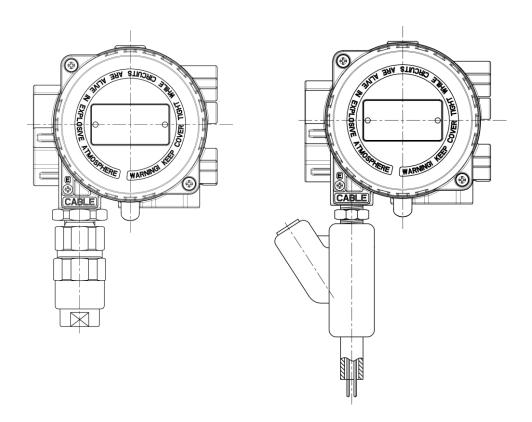

4.4 Connection – Power

4.4.1 Safety

- When installing in hazardous and explosive gas area, conduit tube or pressure-proof packing union must be used. The compound charging box should be the flameproof type and must be sealed completely.
- ➤ Conduit entry connection tap is PF 1/2 or G 1/2.
- Before connecting terminal, ensure that the power is off completely. Do not open the cover when the power is still alive.
- Please use ring-type rug to protect against vibration or any other external impact.

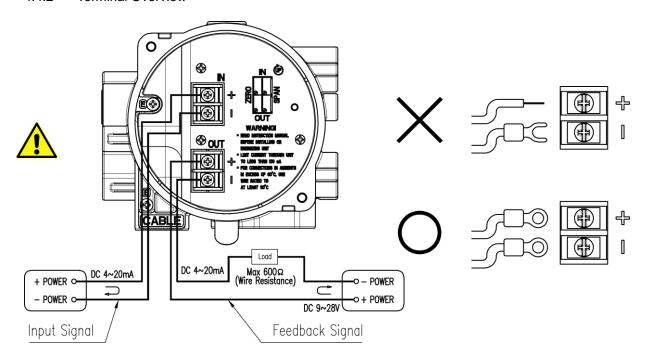

- > YT-930 series should be grounded at outside of terminals or inside of the product.
- ➤ Please use twisted cable with conductor section are 1.25mm² and that is suitable for 600V (complying with the conductor table of NEC Article 310.) The outer diameter of the cable should be between 6.35 ~ 10mm. Use shield wire to protect against electromagnetic field and noise.
- Please do not install the cable near high noise equipment, such as high-capacity transformer or motor. Please use shielded cable if necessary.

4.4.2 Terminal Overview

4.4.2.1 Input Signal Terminal

- 1. Open cover base.
- 2. Please use appropriate union by considering the operating condition. Insert cable with using proper flameproof type packing union
- 3. Locate cable entry of input signal on the left hand and bottom side of the product. Insert cables into the conduit entry and secure them with (+) and (-) terminals on the plate. Make sure to tighten bolts with 1.5 Nm (15 kgf · cm) torque. Please check the polarity of the terminals.
- 4. There are two terminals for grounding.
- 5. Ground resistance must be below 100 ohm.
- 6. Close the cover base completely before using the product.

5. Adjustments

Before our product is dispatched from YTC facility, input signal against supply pressure or supply pressure against input signal will be set correctly. But, if additional setting requires, please see below.

5.1 Zero and Span Adjustments of Input Signal

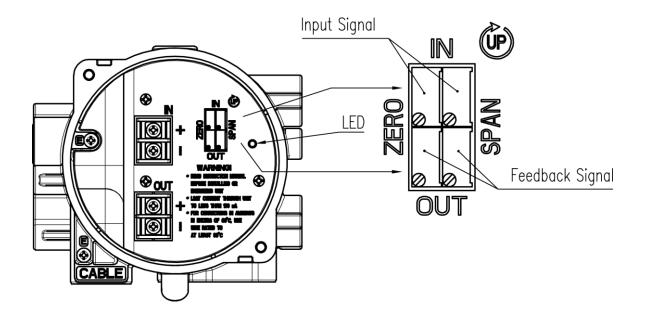

(Based on 4~20mA/0.02~0.1 MPa)

- After wirings have been completed, please supply 4mA as input signal to YT-940. Please check output pressure and adjust zero adjustment bolt by using small (-) screw driver. In general, zero should be set at 0.02 MPa
- 2. Supply 20mA. Please check output pressure and adjust span adjustment bolt to required end output. In general, span should be set at 0.1 MPa.
- 3. Supply 4mA again. Please check the output pressure and repeat step 1 and 2 until required point have been set completely.
- 4. Close the cover base completely

5.2 Zero and Span Adjustments of Feedback Signal

(Based on 4~20mA/0.02~0.1 MPa)

- 1. Feedback signal requires DC 9~28V. Supply 4mA. Please check if the output pressure is at zero point and receive feedback signal correctly. If not, adjust zero adjustment bolt by using small (-) screw driver until the receiving feedback signal is set as 4mA.
- 2. Supply 20mA. Please check if the output pressure is at end point and receive feedback signal correctly. If not, adjust span adjustment bolt by using small (-) screw driver until the receiving feedback signal is set as 20mA
- 3. Supply 4mA again. Please check the feedback signal and repeat step 1 and 2 until required point have been set completely.
- 7. Close the cover base completely before using the product.
