Electrical installation

4-20 mA

4-20 mA 2-wire loop
NR 7100: 12 .. 35 V DC
NR 7100: 15 .. 35 V DC (use of Plug on Display)

With version "Intrinsically safe" (NR 7200 Pos.2 S, X, F, B) connection is done to an approved intrinsically safe circuit (barrier):

$U_i=30\text{ V}$ $I_i=131\text{ mA}$ $P_i=983\text{mW}$

The effective internal capacitance C_i and inductance L_i is negligibly small.

NR 7200 with Display: The terminals are located underneath the Display. Remove the Display to connect the wires.

Wire cross section: 0,2 mm² to 2,5 mm² (AWG 24 to 14)

Use of standard 2-wire cables. If electromagnetic interference is expected which is above the test values of EN 61326-1 for industrial areas, shielded cable should be used. Connect the cable screening to ground potential at one end on the supply side.
